

DSC Testing Report for 1,4-Dinitrobenzene

Report #:	ECUST-RCSC-20240918-X41		
Institute:	Reactive Chemical Safety Center at East China University of Science and Technology, Shanghai, China. RCSC@ECUST (https://rcsc.ecust.edu.cn/)		
Analyst:	Yingzhen Meng, Hongfei He	Test time:	2024-09-18, 2025-03-12
Reporter:	Yingzhen Meng, Hongfei He	Report time:	2024-09-19, 2025-03-28
Reviewer:	Min Sheng	Review time:	2025-06-19
Limits of Applicability:	The testing data generated by the RCSC@ECUST is based on specific samples from a certain supplier. During the testing process, we have made every effort to ensure the reliability of the data, but we still cannot exclude data quality issues caused by supplier differences, sample impurities, deterioration of long-term storage, testing method error, and human error. Therefore, we suggest only using RCSC testing data as a reference, and we do not assume any responsibility for any losses caused by using this data.		
Data Copyright:	Prohibit the sharing of this report on websites outside the Reactive Chemical Safety Center at East China University of Science and Technology. If you have any questions, please contact RCSC@ECUST (https://rcsc.ecust.edu.cn/).		

Chemical Names	1,4-Dinitrobenzene
Synonyms	p- dinitrobenzene
Molecular Formula	C ₆ H ₄ N ₂ O ₄
Hill Notation Formula	C ₆ H ₄ (NO ₂) ₂
CAS #	100-25-4
Test	DSC_N2
Notes	Glass capillary, 0~400 °C, 10°C/min, Nitrogen headspace

Detail information of the tested sample:

Project	Development of Reactive Chemical Database for RCSC@ECUST
Sample Description	clear colorless liquid
Composition	99%
Chemical Structure	
Supplier	TCI
Storage Information	
Sample Status	clear colorless liquid
Other notes	

Testing Result:

1 st test					
Instrument: TA DSC X3		DSC crucible: Glass Capillary		Headspace gas: N2	
Tested sample mass: 0.302 mg		Total pre-test mass: 24.518 mg		Total post-test mass: 24.523 mg	
Start Temperature: 0°C		Scan rate: 10°C/min (Twice)		End Temperature: 500°C	
#	Endo/Exo Peak	Onset T (°C)	Peak T (°C)	End T (°C)	Total Heat (J/g)
1	Endotherm	153.77	174.62	199.19	184.48
2	Exotherm	347.56	437.47	493.31	-3308.6 ¹
Notes: ¹ , TNT equivalent 0.791.
